HOUSE OF GOODNESS

Pomozi.ba Association, Bosnia and Herzegovina

Symbolically named "**House of Goodness**" is a gathering place for friends, partners, socially responsible companies and individuals, all of whom help people and communities.

"House of Goodness" is a place of cooperation of humanitarian associations and other organizations in creating good ideas and partnerships that improve people's lives in difficult times, a place where **goodness is multiplied by sharing.**

The project "Goodness squared" is an ecological sewing room in which new useful items are sewn from discarded textiles.

Pomozi.ba tries to include volunteers in the whole process, but also people in need who, after training, can complete the household budget with their work.

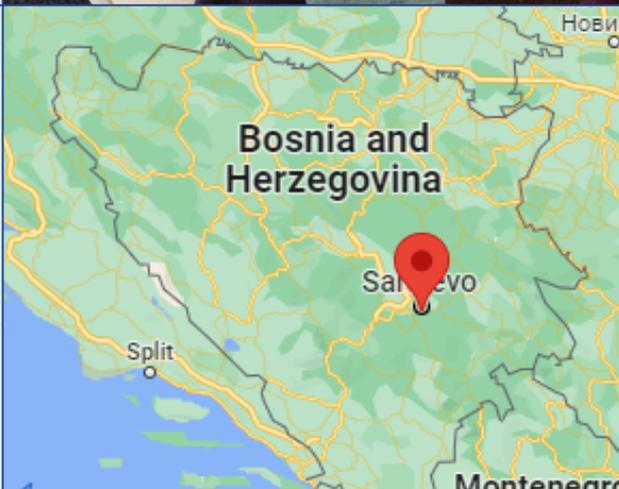

POTENTIAL FOR TRANSFER

"House of Goodness" provides a solution to textile waste management that could easily be scaled up. It empowers women to learn a skill and provide for their families by working from home. It has a huge potential in ecological, social and economic aspects that can be developed into a start-up company.

HOW TO START

- Establish a sewing workshop with space for sorting and cutting fabric and implementing sewing training,
- Secure the initial funds for sewing machines and equipment
- Create a system for collecting old textile
- Establish a relationship with textile and sewing companies, schools and other relevant NGOs
- Enlist and train volunteers
- Find the market for your products
