RESCUE SERVICE AND HEALTHY COMMUNITY

Prilep, North Macedonia

"Rescuing lives is our motto!"

The rescue service was officially registered in 2020, but functioning unofficially for more than 10 years.

It provides assistance and first aid to injured or lost persons and transports them from inaccessible terrains to places where medical teams can pick them up. The association's goal is to be actively involved in the rescue system in the country, connecting with the state institutions in charge of solving this problem.

In addition to this, the rescue service organizes humanitarian events, blood donation events, afforestation activities, educational events, training persons for protection in mountain areas, trainings for mountain rescue and rescue from inaccessible places in rural and urban environments.

Since 2022 they have helped search for 15 missing persons and rescued 25 injured persons and 30 animals from inaccessible terrain, organized training for more than 100 volunteers.

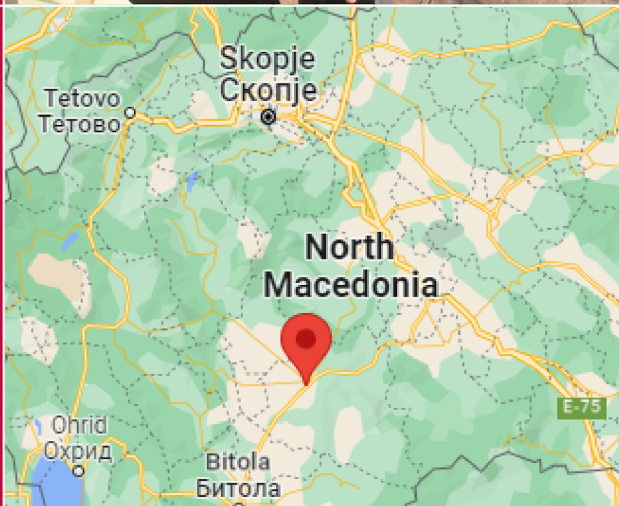

POTENTIAL FOR TRANSFER

The rescue service motivates people, especially young people, to participate in sports events, hiking and sharing the idea of rescuing people and support in the community. The rescue service also promotes adventurous tourism in the Pelagonia region and cave exploration, improving local tourism businesses.

HOW TO START

- Secure funding through projects, municipal support, sponsors and by collecting a minimal membership fee
- Establish partnerships with Governmental and/or Municipal institutions (funding, logistic support and coordination), Rescue service teams from other regions (joint trainings, exchange of experience and help with challenging missions), other similar organisations (scouts, local guides, hiking organisations, etc.) and Civil Society Organizations
